**Subject:** Possible methyl chloride poisoning case

Enforcement confidential. We have a region 2 osc on his way to a vacation Condo complex in St. John in the U.S. Virgin Islands. A family of four are in the hospital , including two teenagers. One is serious condition and two on ventilators. The local environmental agency (which has been less than comprehensive ) confirms that a terminex applicator applied methyl chloride indoors. He had it stockpiled. We have informed stsd and the local health department. Jim, who is most informed on your staff on methyl chloride in case we have questions. Tx
